We look forward to seeing you this coming Summer!

Scholarship Endowment Fund
Together we have raised over $55,000 since 1992

History
In September of 1985 leaders of the Summer Citizens Program initiated a scholarship endowment fund at Utah State University. The intent was to provide an enduring expression of gratitude to USU and to the people of Cache Valley for their hospitality. The endowment is a symbol of the wonderful relationships between the Summer Citizens, the University, and the community.

Recipients
Scholarship recipients are known as Summer Citizens Scholars. They are students who demonstrate personal integrity, academic achievement and future career goals. Recipients must be high school graduates from Logan City School District or Cache County School District. They must be legal residents of the county and citizens of the United States. Special consideration is given to recipients who would be unable to pursue a higher education without financial assistance.

How to Donate
You can donate to the scholarship fund when you register online. We appreciate donations of any amount, from a few dollars to larger donations. The amount of your donation will be paid with your registration fees. You can also donate throughout the summer at the Summer Citizens Office in the Eccles Conference Center, room 103.

If every Summer Citizen donated just $10 each, we could add at least $6,000 to the endowment every year! Please donate what you can this year!

Past Summer Citizens Scholars

Ashley Perez
Ashley recently graduated from Ridgeline High School and is going to school to become a high school Spanish teacher so that she can connect with her students and help them be successful both in the classroom and outside of it. In addition to helping her future students, Ashley is going to school to set an example to her younger brothers and those around her as she becomes the first person to graduate with a college degree in her family. Throughout high school, Ashley has worked as a Teacher Aide at Ridgeline High School, a reading aide at one of the local elementary schools, and at McDonald’s. In her spare time, she is heavily involved in her church youth group and helps plan and schedule lessons and activities for the children’s ministry group. She truly cares about those around her and never ceases to show them. She is going to touch so many lives as she meets new people in her classes and on campus.

Kiley Duersch
Kiley recently graduated from Ridgeline High School and will be attending Utah State University in the fall. She plans to major in accounting. She is a good student and is passionate about gaining an education. During high school, she spent time as the girls’ basketball manager and served on the Nibley City Youth Council for three years. Part of her responsibilities on the youth council allowed her to plan some of the big events in Nibley such as the Movie in the Park, Nibley’s Heritage Days, and Halloween Boonanza. As the oldest in her family, she is a good example to both her siblings and others around her as she is driven and persistent in the face of opposition. She is a natural leader and is willing to work hard. Kiley is going to be successful in whatever she ends up doing in the future.

**Anyone Can Sing!**

Course ID: Course #120
Date: May 31 – June 3
Time: 1:30 PM – 3:00 PM
Days: Tue – Fri
Price: $50
Location: HH 130

**Description:** This class is for those who have little or no singing experience, and we will be singing each day. Last year I taught this same class and have made some minor changes. How many of you have heard someone say “I can’t sing” or have even said it yourself? IT’S NOT TRUE! Well, maybe it is at the moment, but that can quickly change. The reality is we can learn how to sing.

Very few people sing well from the start, and even those few end up taking voice lessons or being coached along the way to improve. I have worked with students who were “tone deaf,” but they worked hard and ended up singing in recitals 1–2 years later. There are two parts to learning how to sing: 1) ear training and 2) vocal technique. This class will focus on both of these skills. We will also discuss and practice taking good care of your voice. I am in my 60’s and my voice is the best it’s ever been, so don’t let age stop you!

**Prerequisites:** No prerequisite other than a desire to sing. Bring water to drink, a notebook and pen, and a little bravery.

**Instructor:** Warren Kunz

**Prerequisites:**

A prerequisite is an open mind. To listen to musical examples at home, it would be best to have a laptop, tablet, or desktop computer with audio.

DESCRIPTION: When a loved one dies there is a tremendous emotional loss and at the same time there is an administrative nightmare. I am 78 years old and my wife is 71 years old. My probability of predeceasing her is over 95%. Approximately ten years ago I started to work on a complete step by step process for my wife to follow when I die. We now have a file, “Steps to Take Upon the Death of a Loved One,” which outlines this process and includes things such as pre-addressed and signed letters and a detailed listing of our assets, etc. I have been teaching this class for the last six years and I will share with you how to do this for your loved one. This class is repeated 4 times, you only need to take it once. Each class is $10 and each is limited to 20 people.

PREREQUISITES: The attendees will need to bring a pencil or pen.

INSTRUCTOR: Mel Parker – retired as Executive Vice President of Bankers Life Insurance company in St. Petersburg, Florida in the summer of 2013. **Beyond Cat’s Cradle: String Figures from Around the World**

| Course #218 | June 6 – 10 | 9:45 AM – 11:00 AM | Mon – Fri | HH 131 |

DESCRIPTION: Most of us are familiar with “Cat’s Cradle,” the children’s game played with a loop of string in which patterns are made and passed between players. But did you know that there are thousands of other patterns you can make with just a loop of string? Or that cultures around the world have been doing just that for hundreds—if not thousands—of years? Anthropologists of the 19th and early 20th centuries studied the string figures of cultures around the world, but you don’t need to be a scientist to appreciate their beauty and magic. Class is limited to 20 people.

PREREQUISITES: Loops of string will be provided for all participants. Making these patterns will require a certain degree of manual dexterity, but even if you are not able to make your fingers perform the necessary movements, you’ll enjoy the glimpses of ancient cultures and what their stories tell us about how they viewed their world.

INSTRUCTOR: Jamis Buck, As a computer programmer, Jamis loves algorithms—descriptions of processes—like recipes, directions, computer programs, and yes, string figures. He’s fascinated by the ways in which a simple loop of string can be manipulated to produce elaborate patterns, tell stories, share experiences, and make friends.
